

GAME CHANGER™ | KIS

Keep it simple. One of the smartest sayings we know.
The inspiration for GameChanger KIS. Straightforward yet
stylish desks that are easy to mix, match and combine.

GAME CHANGER™ | KIS

KEEP IT SIMPLE

For teamwork and task-oriented work, sitting and standing. The KIS system enable you to be private when necessary, public when wanted. And it comes with oodles of optional accessories.

Environmentally responsible

Man-made VOCs – volatile organic compounds – are bad for our health and our environment. The laminates and coatings we use are certified VOC-free and our processes meet all leading global environmental standards.

Design based on people

GameChanger designer Stefan Brodbeck believes great design begins with 'design based on people.' Result: GameChanger KIS delivers a great working experience that means work will never be the same again.

Super-easy to assemble

GameChanger KIS has a lightweight frame that is strong and easy to assemble, disassemble, reconfigure and move as your business grows and changes.

Proudly made in South Africa

All Angel Shack products are manufactured at our factory in Johannesburg and we comply with all employment, health and safety laws.

Make your desk a locker

GameChanger KIS has functionality and security. Just slide the optional movable worktop to one side to reveal a roomy, lockable space. Ideal for securing personal possessions at work.

GAME CHANGER™ | KIS WORKS THE WAY YOU DO

GameChanger accessories help you get organised and stay organised as well as personalise your space.

The multifunctional screen ensures privacy and provides a handy place to put optional accessories like adjustable shelves.

Extensive storage options for items big and small ensure you're never lost for space and somewhere to keep something safe.

Sliding privacy screens

GameChanger works the way we do today: alone one moment and together with colleagues the next. GameChanger KIS's innovative sliding screens mean you can be public or private any time you choose.

TIME TO CHANGE THE GAME

Why is office furniture so expensive?

Why is it so difficult to order and assemble?

And can't we make a system that works the way we do?

The big idea

Business is changing. Life is changing. But there's one aspect of work that remains stuck in the past: office furniture. We think it's time to change that. To bring it into the 21st century. Our idea? Create innovative, high quality furniture that works the way we do today. Make it easy to plan and buy. Make it affordable for more companies and organisations. Our secret?

1 World-class designer

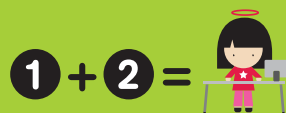

First we asked acclaimed German industrial designer Stefan Brodbeck to work with us on turning our ideas into innovative products.

2 World-class production team

Then we put together a world-class team in product development, manufacturing, marketing, logistics, quality control, environmental standards and every other aspect of the business.

The result is a GameChanger

Inspiring systems for creating, writing, meeting, dreaming and working.

All of them environmentally smart. All of them proudly made in South Africa.

Our ambition is to be the number one choice for thinking people who want to work in a better world. Join us.
